BigDot
SaaS CRM
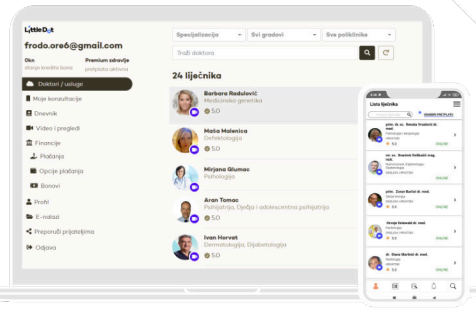

A platform that improves healthcare

BigDot, a modern approach to healthcare, is a solution for:

Professional organizations
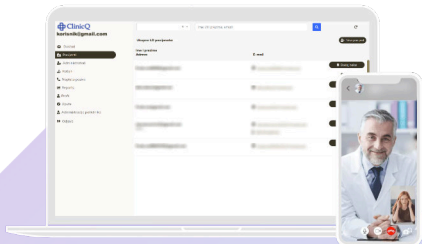

that want to add healthcare to their businesses:

- insurance companies
- pharmacies
- veterinary clinics
- hotels

Health system

institutions that want to fully digitalize their businesses:

- clinics
- polyclinics
- hospitals
- laboratories
- rehabilitation centers

Connectivity with all wearable devices

Does health data for your users come **from multiple sources, such as Garmin, Samsung, and Apple in various forms and technologies**?

Regardless of the source, **we give you access to data in a structured way.**

Data security at bank level

24/7 security

BigDot

Cloud-based software solution

Work smarter, reach more patients and increase your income

- ✓ Easy to set up
- ✓ No need to download the app
- ✓ No installation

Be available to patients regardless of time and location, with quick access from any device.

Learn more about BigDot

An end to end solution for your business. From online consultations to diagnostics, receiving orders for examinations, billing, reporting KPIs and much more.

It's like using your own solution

Use your logo, your colors and a personalized subdomain to make your patients feel comfortable.

One click billing

At the end of the online consultation, **you issue a fiscalized invoice with one click.** We offer transparent business operations and honest communication.

Self-scheduling for patients

Appointment reservations for:

- virtual visits
- in-person visits
- diagnostic imaging

Set up your own prices and availability

Create packages according to the wishes and needs of your patients (basic package, for her, for him, etc.). **You can decide how each package works and what its availability is.**

E - documents

Secure communication with patients is enabled at all times. **You can share e-documents and update them.** They'll immediately be visible in the patient's app.

Enhance the growth of your business

Simple and easy-to-understand graphical reports that allow monitoring and identifying opportunities for improvement.
